

One Hundred Years

St. Helena church celebrates its one hundredth anniversary in 2002. Over the years the church has been a gathering place for worship and celebration. Though improvements to the building have been done over the many years, the building is in dire need of renovation. This brochure highlights the current plan for those improvements and the manner in which funds will be collected and applied.

We hope you can be a part of this noble effort through your donation of money, supplies or time. It is a big project, but with your help, we can make our place of worship even more beautiful!

In 2002 St. Helena's church will be 100 years old!

WHAT WE WILL RENOVATE

Four different projects will be undertaken at St. Helena's. The first will be to repaint the walls and ceiling of the church. This effort alone will brighten up the building which has not seen any major interior work since the 1950's.

The second project will be to rewire the entire building. Much of the wiring is very old and needs to be replaced or updated. It is considered a top priority in order to protect the building and the people who use it.

Project number three will be to replace the original boiler that heats the building and provides hot water.

The fourth project will be a complete renovation of the kitchen and basement facilities. This includes a new kitchen, bathrooms, flooring and lighting improvements, new furnace and handicap accessibility. It will be the most costly part of the renovation.

The estimated cost for each project is listed on the pledge card. Your contribution will be applied toward that project.

WHERE WILL THE MONEY COME FROM?

The Finance Committee has decided to finance the project using a "revolving method" of financing. Fund raising will begin for each project. When money collected reaches a certain target, that money and an equal sum from the parish's cash reserve will be used to begin the project. Fund raising will continue until the cost of the projects are covered and the cash reserve is replenished. Then the process starts all over again for the next project.

Your Pledge
